

(1)

Place the aroma beads (20 to 35 beads) in the plate and spray them with the fragrance of your beloved for up to 24 hours until the beads become dry.

(2)

Position the bracelet so that the hook of the bracelet is facing upward and find the handle of the aroma beads holder, located where the brand logo "Intisars" is engraved.

(3)

Gently pull the handle towards you with your index finger until you hear a click and the flap unlocks.

(4)

Take the tweezers and start placing the aroma beads into the holder until it's filled. Push the flap in so that you hear another click to close and secure the scent holder.

(5)

The final step is asking your beloved to wrap the Aqqal bracelet around your wrist to show you that you are so loved. Gently push the hook in to adjust the size to large by the first click, medium by the second click, and small by the third click.
